Our vision is a world without fragility fractures, in which healthy mobility is a reality for all.
FOREWORD

As the leading global organization in the field, IOF’s goal is to promote osteoporosis as a public health priority, and to increase education and research, optimize the uptake of diagnostic and therapeutic interventions, and improve secondary fracture prevention through models such as Fracture Liaison Services.

“…”

At the heart of all our efforts lies a commitment to patients – who deserve independence and mobility, free of fragility fractures.

Prof. Cyrus Cooper, IOF President

THANKS TO OUR PARTNERS

P. 46
OUR TEAM IN 2022
As we reflect upon the past year, I am filled with a sense of pride and gratitude for the journey we have embarked upon together.

The year 2022 has been marked by important successes and significant highlights. We celebrated the remarkable 10th year anniversary of our Capture the Fracture® initiative and also achieved the incredible milestone of 800 Fracture Liaison Services in the network. Little did I think, when I laid down the framework for this landmark programme a decade ago, that it would have such a tremendous impact in strengthening secondary fracture prevention worldwide. To see it move from strength to strength is a great source of pride, and I anticipate that the programme will evolve to respond to changing policy landscapes and priorities in the future.

The growth and increasing breadth of the IOF network, which now covers 94% of the global population, is another achievement to be celebrated. The launch of the University Network has been a tremendous success, bringing young academics into the fold, while new organizational members such as the NCD Alliance and APCO have expanded global and regional representation and reach. In fact, regional representation within the network has been strengthened, with Africa and the Middle East now each recognized as separate regions within the IOF Committee of National Societies. The new Africa Regional Advisory Council opens up possibilities for growth and collaboration in a region which has previously been underserved in regard to musculoskeletal disease research, education and public awareness.

IOF’s influential Committee of Scientific Advisors (CSA) brings together the world’s leading experts in the field. The CSA Working Groups publish important papers that set best-practice standards and build global consensus. Notable this year were the publications on global approaches to rehabilitation and on population screening for fracture risk, as well as collaborative publications with other leading organizations. Launched last year, our BoneCast webinars have been incredibly successful and in 2022 continued with 13 sessions, attracting more than 6000 views, on a wide range of topics in the bone field. I’d also like to thank the editors of IOF’s three highly respected scientific journals, Osteoporosis International, Archives of Osteoporosis and Calcified Tissue International, which have earned increasing impact factors.

Our commitment to advocating for positive change in healthcare policy has been unwavering. Indeed, IOF acts as a catalyst for change, providing evidence-based insights and influential initiatives to help shape healthcare policies and practices worldwide. In 2022 highlights included the continued dissemination of the Scorecard for Osteoporosis in Europe (SCOPE), numerous policy publications under the Capture the Fracture® umbrella, and the launch of a new IOF Latin American Audit. The Audit collects data from 19 of the 20 countries in Latin America, representing more than 94% of the regional population, and presents updated data on fragility fractures as well as projections to 2050. The findings will help experts quantify the burden of osteoporosis, as well as more fully understand the barriers and opportunities that must be addressed across the region.

Osteoporosis is a global healthcare challenge which can only be tackled through collaboration and the commitment of many stakeholders. On behalf of IOF, I extend my heartfelt gratitude to our entire network, to the IOF staff, and to our many allies and supporters, including the corporate partners which have supported our important projects and programmes in 2022.

Your contributions, hard work and steadfast support have helped to lay the foundation for a brighter future for osteoporosis patients worldwide.
MESSAGE FROM THE CEO

Dr Philippe Halbout, IOF CEO

Advocacy for osteoporosis prevention raises public awareness, empowers individuals, promotes preventive strategies, and influences healthcare policies.

By emphasizing the importance of bone health, IOF works to reduce the burden of fractures, aiming towards a future with fewer fragility fractures and improved quality of life for patients and people at risk.

Indeed, regarding advocacy for bone health, in 2022 we literally reached for the stars with our extraordinary ‘Lift Off For Bone Health’ campaign in collaboration with the renowned European Space Agency (ESA) Astronaut Samantha Cristoforetti. We were so privileged to work with Samantha, and to benefit from her extraordinary support – even from aboard the International Space Shuttle! The campaign helped us reach more than three million people, and an new, younger audience, through video messages translated into 10 languages. Public awareness of bone-healthy lifestyle was also the focus of our extremely successful World Osteoporosis Day ‘Step up for bone health’ campaign. Campaign messages and resources were widely disseminated through our member organizations worldwide, resulting in unprecedented outreach to the general public and patients around the world through press releases, social media campaigns and more than 225 events or campaigns held in 50 countries worldwide.

The importance of regional collaboration in driving policy change was highlighted by specific efforts in the Asia Pacific and in Latin America. I was very proud to attend the Asia Pacific Consortium on Osteoporosis (APCO) Scientific Summit in Singapore, which brought together leading experts to further the vision of reducing the burden of osteoporosis and fragility fractures in the world’s most populous and fastest ageing region. In a visit to Latin America, we strengthened ties with influential organizations and institutions in Brazil and Mexico, an endeavour that was capped off by the publication of a new IOF LATAM Audit, 10 years after the first ground-breaking LATAM audit.

Efforts to drive policy change, primarily through improvements in post-fracture care, also continued under the umbrella of our Capture the Fracture® program with its growing network and important library of policy publications and resources. In 2022 this included the publication of country specific policy landscape assessments for Italy, France, the Netherlands and Spain. Establishing national coalitions comprised of KOLs and important stakeholders was another key focus of the program and this year we were delighted to facilitate the successful kick off of coalitions for Mexico and Turkey. Finally, it was a great pleasure to celebrate Capture the Fracture’s 10th anniversary by highlighting the individual achievements of our dynamic FLS network in a special social media campaign that took place over three months.

As always, patients remain at the core of IOF’s mission and strategy. This was highlighted in two very different ways in 2022. We participated in the launch of the Patient Advisory Group in France, an exciting pilot project which is providing incredibly important insights. We also launched, in cooperation with the Bone Health and Osteoporosis Foundation (USA), the ‘Osteoporosis and Fracture Risk Evaluation tool’, a resource that can be used in primary care settings to facilitate dialogue between doctors and patients and to improve patient knowledge of osteoporosis risk factors and their understanding of the benefits versus risks of treatment.

I am proud that our work has become a driving force for change, shaping policies that positively impact the lives of people with osteoporosis around the world. I extend my heartfelt gratitude to all whose hard work, collaboration, expertise, and commitment has helped us reach new heights in 2022.
The International Osteoporosis Foundation (IOF) is the world’s largest non-governmental organization dedicated to the prevention, diagnosis, and treatment of osteoporosis and related musculoskeletal diseases.

Working together with its key membership committees, IOF is strongly committed to its mission of promoting bone and musculoskeletal health as a worldwide priority.
IOF unites an influential global constituency of patient societies, research and medical organizations, healthcare professionals and international companies. Through its membership committees, IOF has a powerful voice and unparalleled outreach to the public, patients, healthcare professionals, policymakers, and media worldwide. Reflecting the importance of regional representation, IOF’s Board of Governance has equal representation from each world region, and three Regional Advisory Councils (RAC) support the efforts of national osteoporosis societies in their geography and determine programming priorities in line with IOF’s global strategy.

Committee of National Societies (CNS)
314 Patient & Medical Societies, other organizations, from 151 countries

Committee of Scientific Advisors (CSA)
166 of the world’s leading experts

Committee of Corporate Advisors (CCA)
11 Companies interested in bone health

Regional Advisory Councils (RACs)
4 RACs representing CNS in the Asia Pacific, Middle East, Africa, Latin America

Board of Governance
20 members, 4 from each of 5 global regions

Executive Committee (EXCO)
6 members, a subgroup of the Board
BOARD MEMBERS

The IOF board comprises internationally recognized experts and thought-leaders in the field. With twenty elected members, comprising four representatives from each of five world regions, the Board reflects IOF’s commitment to international representation and coordination.

EX-OFFICIO MEMBERS OF THE BOARD

EXECUTIVE COMMITTEE
- IOF President: Cyrus Cooper
- Honorary President: John Kanis
- Secretary General: Bess Dawson-Hughes
- Treasurer: René Rizzoli
- CSA Chair: Nicholas Harvey
- CNS Chair: Jean-Yves Reginster

COMMITTEE CHAIRS
- Chair CSA: Nicholas Harvey
- Vice-Chair CSA: Serge Ferrari
- Chair CNS: Jean-Yves Reginster
- Chair CNS Patient Societies Subcommittee: Famida Jiwa
- Chair CCA: Marika Murto
- Vice-Chair CCA: James Pilachowski
REGIONAL ADVISORY COUNCILS

Four Regional Advisory Councils (RAC) support the efforts of national osteoporosis societies in Africa, the Asia Pacific, Latin America, and the Middle East. RAC members, elected by the CNS members in the region, determine programming priorities for their respective regions, in accordance with IOF’s global strategy.

**ASIA-PACIFIC REGION**
- Joon Kiong Lee, MYS (Chair)
- Manoj Chadha, IND
- Manju Chandran, SGP (Deputy Chair)
- Peter Ebeling, AUS
- Edith Ming-Chu Lau, HKG
- Ambrish Mithal, IND
- Toshikata Nakamura, JPN
- Tony Setiabudhi, IDN
- Atsushi Suzuki, JPN
- Keh-Sung Tsai, TWN
- Thanut Valleenukul, THA
- Weibo Xia, CHN

**EX-Officio RAC Members - IOF Board Members**
- Peter Ebeling, AUS
- Manju Chandran, SGP
- Ambrish Mithal, IND
- Toshikata Nakamura, JPN

**LATIN AMERICA REGION**
- Maria Belen Zanchetta, Southern Cone (Chair)
- Luis Vidal Neira, Andina (Chair)
- Adriana Orcesi de Pedro, BRA
- Adriana Medina, Caribbean
- Sonia Cerdas, Central America
- Victor Mercado Cárdenas, MEX

**EX-Officio RAC Members - IOF Board Members**
- Claudia Campusano, CHL
- Patricia Clark, MEX
- Marise Lazaretti Castro, BRA
- Osvaldo Daniel Messina, ARG

**CSA Members**
- Bruno Muzzi Camargos, BRA
- Jorge Morales Torres, MEX
- Cesar Bogado, ARG

**AFRICA REGION**
- Leith Zakraoui, TUN (Chair)
- Motare Henry Efamba Nongo, CMR
- Tereza Hough, ZAF
- Yasser El Miedany, EGY
- Ngozi Rosemary Njeze, NGA (Deputy Chair)
- Tobias de Villiers, ZAF

**EX-Officio RAC Member - IOF Board Member**
- Leith Zakraoui, TUN (Chair)

**MIDDLE EAST REGION**
- Gemma Adib, SYR (Chair)
- Nizar Abdulateef, IRQ
- Bagher Larjiani, IRN
- Basel Masri, JOR
- Youssef Saleh, SAU

**EX-Officio RAC Members - IOF Board Members**
- Gemma Adib, SYR (Chair)
- Basel Masri, JOR
- Youssef Saleh, SAU
COMMITTEE OF SCIENTIFIC ADVISORS (CSA)

It is a great privilege to be at the helm of IOF’s Committee of Scientific Advisors, whose members are recognized as world leaders in the field.

The CSA working groups make important contributions with publications that influence global best practice and consensus in key areas of clinical research.

Prof. Nicholas Harvey, CSA Chair

The CSA objectives, are to:

• Advise the Board in scientific matters related to IOF;
• Further IOF’s clinical and research objectives;
• Support national policy changes relating to musculoskeletal health;
• Provide their expertise regarding scientific content of IOF’s courses and congresses;
• Provide recommendations for practice in the care of osteoporosis at the global level.

IOF CSA WORKING GROUPS

The CSA publishes influential topical publications which have an impact on global research and clinical best practice.

The groups develop global policy guidance, scientific guidance and statements to update IOF positions, and educational and research projects of international relevance.

In 2022, the following 10 CSA Working Groups were active (see papers listed on page 26).

• Bone and Cancer (Chair, R. Rizzoli)
• Bone and Cardiovascular Diseases (Chairs, J. Cannata Andia, S. Ferrari)
• Bone and Diabetes (Chairs, S. Ferrari & C Meier)
• Epidemiology/Quality of Life (Chairs, J. Kanis, D. Prieto-Alhambra)
• Fracture (Chairs, K. Akesson, K. Javaid)
• Standardization of Bone Marker Standard Assay – with IFCC (Chair, E. Cavalier)
• Rehabilitation (Chairs, O. Bruyère, D. Pinto)
• Chronic Inflammation Bone Structure (Chair, O.D. Messina)
• Vitamin D (Chair, M. Sosa)
• Skeletal Fragility & Chronic Kidney Disease (Chairs, M. Fusaro, S. Ferrari)

The CNS, IOF’s key membership committee, represents a wide range of organizations which are dedicated to osteoporosis and musculoskeletal health.

As well as national, regional and international patient and medical societies, the CNS comprises organizations within the recently introduced Allied Member Category which includes the IOF University Network (see page 15), hospitals and various advocacy groups.

Being part of the IOF-CNS Community where we are all working together to make change happen in the way osteoporosis is diagnosed and treated is an absolute privilege.

Teréza Hough, CEO of the National Osteoporosis Foundation of South Africa

In recent years, CNS involvement in various operations and initiatives has been reinforced, with increased CNS input into scientific and policy programs.

At the end of 2022 the CNS counted 314 Members in 151 countries/territories.
NEW CNS MEMBERS IN 2022

INTERNATIONAL / REGIONAL ORGANIZATIONS

- NCD Alliance
- ECHO Bone Health
- Asia Pacific Consortium on Osteoporosis (APCO)

NATIONAL ORGANIZATIONS

- The Mongolian Naran Society for Osteoarthritis and Musculoskeletal Health (Mongolia)
- Myanmar Society of Endocrinology and Metabolism (Myanmar)
- Rheumatology and Osteology Research Foundation (Argentina)

UNIVERSITY NETWORK

Asia-Pacific

- Universiti Sains Malaysia, School of Medical Sciences (Malaysia)
- International Islamic University Malaysia, Department of Medical Surgical Nursing, Kulliyyah Nursing (Malaysia)
- Aga Khan University (Pakistan)

Europe

- Geneva University, Faculty of Medicine (Switzerland)
- Hacettepe University, Faculty of Medicine, Department of Physical Medicine and Rehabilitation (Turkey)
- University of Oxford, Nuffield Department of Orthopaedics, Rheumatology and Musculoskeletal Sciences (NDORMS) (United Kingdom)
- University of Oxford, Oxford Centre for Diabetes, Endocrinology and Metabolism (OCDEM) (United Kingdom)

Latin America:

- Faculty of Medical Sciences Minas Gerais / Faculdade de Ciencias Medicas de Minas Gerais (FCMMG) (Brazil)

IOF UNIVERSITY NETWORK

The IOF University Network, launched in November, 2021 welcomed 8 new members in 2022, and is now comprised of 37 Universities from 11 countries.

The Network integrates renowned academic institutions into the IOF family of member organizations, and achieves important objectives including facilitating liaison with young investigators within leading research institutions, who may one day become the next generation of key opinion leaders in the field. It also provides opportunities to share knowledge in the bone field and to elaborate new programs for young scientists and healthcare professionals collectively.

IOF University Network Membership Benefits

We invite academic institutions, medical schools and research institutes to join and be part of a global community of bone health advocates.

FREE REGISTRATIONS

Opportunity to benefit from up to 10 free registrations to attend the annual WCO-IOF-ESCEO Congress

ENDORSEMENT

Apply for endorsement of musculoskeletal and bone health related postgraduate & Master programs

COLLABORATION

Opportunity for collaboration on research projects & access to a global network of experts worldwide

ADVOCACY RESOURCES

Access to advocacy resources to support organisation of osteoporosis awareness activities

EDUCATIONAL RESOURCES

Access to educational and scientific resources & materials including the IOF Educational Hub

ENDORSEMENT

Opportunity to apply for endorsement of musculoskeletal and bone health related publications and meetings
CNS MEDAL

The CNS Medal is an annual award which honours an individual who has made an important contribution to the IOF Committee of National Societies through active participation in CNS activities and by expanding IOF’s message and outreach at the local level.

In 2022 IOF was pleased to present the CNS Medal to Teréza Hough, CEO of the National Osteoporosis Foundation of South Africa (NOFSA) in recognition of her longstanding support of IOF initiatives and important work on behalf of osteoporosis education and advocacy in South Africa and within the region.

CNS AT THE VIRTUAL WCO-IOF-ESCEO 2022

Once again, the annual WCO-IOF-ESCEO Congress was held virtually due to continuing uncertainty and travel restrictions resulting from the Covid-19 pandemic in various parts of the world. Nevertheless, in addition to the CNS Medal presentation, there was robust CNS participation at the CNS scientific session featuring 9 abstracts, and 32 booths presented at the CNS virtual village.

IOF MEETINGS WITH CNS MEMBERS

Two virtual meetings were held, giving IOF and its members the opportunity to interact and exchange information and valuable feedback. Meetings were held as follows, each with participation by up to 50 member societies.

- **23 MARCH**
  Update on IOF Operations and upcoming WCO-IOF-ESCEO 2022 Virtual Congress, as well as a special roundtable discussion on key challenges faced by national societies/organizations in driving policy changes, in the development of FLS, in supporting secondary fracture prevention and in raising awareness.

- **19 MAY**
  A special World Osteoporosis Day Webinar to present the theme of the 2022 campaign as well as newly developed resources and materials available for local campaigns for use at the local level.

IOF CONNECT

IOF Connect is a Facebook group established exclusively for the CNS network as a forum for the exchange of information and experience.

In 2022 IOF Connect had 173 followers, representing 76 CNS societies. More than 150 IOF posts highlighted new resources and organizational news of interest to the CNS community.

IOF is a respected and influential voice at the forefront of clinical research and education in the field.

Within its science program, activities include world-class conferences and training courses, educational webinars, support of innovative research, leading scientific publications, important Working Group position statements, the IOF Capture the Fracture® program, and collaborations across specializations and disease areas.
With Covid-19 pandemic disruptions continuing, and given the success of the previous year’s virtual Congress, the decision was taken to once again hold the annual IOF-ESCEO global Congress in a virtual format.

Record-breaking global participation at the Virtual WCO-IOF-ESCEO 2022 testifies to the Congress’ status as the world’s leading clinical forum in the field. Many of the sessions, including the plenary sessions, were held as ‘live’ virtual presentations with opportunities for Q&A, and access to the recordings of the entire scientific program and 16 virtual exhibition booths was provided for a further three months resulting in unprecedented global outreach. The Congress was accredited by the European Accreditation Council for Continuing Medical Education (EACCME®) with 13 European CME credits (ECMEC®s). For the first time, the highlights of the congress were made available in Spanish thanks to an initiative of Dr Maria Belen Zanchetta (RAC member).
At the WCO-IOF-ESCEO 2022, IOF recognized the scientific work and individual achievements of six leading experts through the presentation of the following prestigious Awards:

**IOF President's Award**

Prof. René Rizzoli, Emeritus Professor of Medicine at the University Hospitals of Geneva, was honoured with the prestigious IOF President's Award. The Award honours individuals who have made a significant and longstanding contribution to the advancement of the work of the IOF, through furthering one or more of the mission statements and/or goals of the Foundation.

**ESCEO-IOF Herbert Fleisch Medal**

The 2022 Herbert A. Fleisch ESCEO-IOF Medal was awarded to Prof. Antonio Cherubini, Chief, Geriatria Accettazione Geriatrica e Centro di Ricerca per l'Invecchiamento, Geriatric Hospital, IRCCS-INRCA, Ancona, Italy and Associate Professor of Gerontology and Geriatrics, Perugia University Medical School. It is awarded in recognition of outstanding and ground-breaking achievements in basic bone science or musculoskeletal research.

**ESCEO-IOF Young Scientist Award**

This Award recognizes young investigators in the field who have demonstrated outstanding scientific merit early in their careers. The prestigious award was presented to Dr. Nicholas Fuggle, NIHR Academic Clinical Lecturer at the MRC Life Course Epidemiology Centre at the University of Southampton, Lead of the Clinical Artificial Intelligence special interest group at the Alan Turing Institute, and Honorary Secretary of the International Society for Digital Health.

**ESCEO-IOF CSA Medal of Achievement**

The recipient of this prestigious annual award was Prof. Thierry Thomas, M.D., Professor of Medicine and Head of the Department of Rheumatology at the University Hospital of Saint-Étienne, France. The CSA Medal of Achievement honours an individual researcher who has significantly advanced the field of osteoporosis through original and outstanding scientific contributions. It underlines important aspects of IOF’s mission – to increase understanding and awareness of osteoporosis and to promote medical innovation and improved care.

**IOF Olof Johnell Science Award**

The 2022 IOF Olof Johnell Science Award was presented to Prof. Elaine Dennison, Professor of Musculoskeletal Epidemiology and Honorary Consultant in Rheumatology at the MRC Life Course Epidemiology Centre, University of Southampton, UK. The Award recognises individuals who have made outstanding contributions to the field of osteoporosis in a scientific or policy implementation area worldwide.
IOF 2022 NUTRITION AWARDS

Presented on the occasion of the Virtual WCO-IOF-ESCEO 2022, the IOF Nutrition Awards, each comprising a grant of 1000 USD and a certificate, were presented to five young investigators from Australia, India, and Switzerland in recognition of their outstanding research abstracts in the field of nutrition and musculoskeletal health.

The winners were: M. Sim (Australia), M. Papageorgiou (Switzerland), Feng Pan (Australia), M. M. Cervo (Australia), and G. C. Kakadiya (India).

IOF ACADEMY – ADVANCED COURSE ON OSTEOPOROSIS

In 2022 work began on the development of a new IOF e-learning platform which will feature a CME-accredited advanced on-demand online course to provide the latest knowledge on diagnosis and management of osteoporosis.

The course will be targeted to an audience of specialists in the fields of rheumatology and endocrinology, including those in training, with planned launch in late 2023.

IOF SKELETAL RARE DISEASES (SRD) ACADEMY AWARDS & BURSARIES

Six young researchers were awarded a certificate and grant/bursary of 1000 USD /500 USD in recognition of their outstanding abstracts related to rare disorders of the skeleton.

The Award winners were A. Mercier (France), C. Grimbly (Canada), F. Miglietta (Italy), M. A. L. Legrand (France) and bursary winners were S. Donati (Italy) and I. Falsetti (Italy).

OSTEOPOROSIS: ESSENTIALS OF DENSITOMETRY, DIAGNOSIS AND MANAGEMENT COURSE

The joint IOF and ISCD initiative provides high-quality clinical training to improve the diagnosis and management of patients with osteoporosis. In 2022, 7 on-site courses and 4 online courses were held in 8 countries, with 620 registrations. Since 2015, 138 courses have been held in more than 36 countries, with over 8425 participants internationally. In 2022 the educational materials and exams were also developed in Portuguese.
BONECAST WEBINAR SERIES

Launched in 2020, the IOF BoneCast webinars have been incredibly successful, reflecting the renowned expertise of the speakers and relevance of the largely clinical topics presented.

Covering a wide range of topics, the webinars provide state-of-the-art education for healthcare professionals worldwide, hosted by members of IOF’s CSA, as well as by experts within the Capture the Fracture® program and by invited external speakers. In 2022, topics covered included: bone and cardiovascular disease, skeletal rare diseases, bone and transplantation, HIV, bone and dementia, osteoporosis drug effects in diabetes, and bone health in transgender individuals among others.

CSA SESSION AT THE WCO-IOF-ESCEO 2022

The virtual IOF-ESCEO World Congress included a session of three lectures dedicated to CSA Working Group topics, chaired by Prof. Nicholas Harvey.

- Assessing metastatic and non-metastatic fracture risk in patients with cancer - Cyrille Confavreux (Bone and Cancer WG)
- Role of bone microstructure in diabetes bone fragility - Serge Ferrari (Bone and Diabetes WG)
- Can we improve communication of risk to patients? - Mickaël Hiligsmann (Epidemiology & Quality of Life WG)

HIPGEN STUDY

Since 2018, IOF has been the communications partner for the HIPGEN clinical trial, a phase III, multicentre study, designed to determine the efficacy, safety and tolerability of intramuscular injections of allogeneic PLX-PAD cells for improved recovery following arthroplasty for hip fracture.

Following the 4th Annual Meeting held on March 1, 2022, IOF attended the final HIPGEN meeting which was held on September 12-13, 2022. IOF looks forward to communicating on the publication of the scientific results when these are available.

IOF SCIENTIFIC WORKING GROUPS

The scientific working groups of the IOF Committee of Scientific Advisors formulate policy guidance, scientific guidance, and consensus statements, as well as develop educational and research projects of international relevance.

In 2022 there were 10 CSA Working Groups (listed on page 12), including the following newly formed Working Groups.

VITAMIN D WORKING GROUP

Chaired by Prof. M Sosa-Henríquez, this Working group aims to provide guidance on vitamin D for bone health, with a pragmatic approach to vitamin D treatment and supplementation, including the loading doses and toxicity.

SKELETAL FRAGILITY & CHRONIC KIDNEY DISEASE WORKING GROUP

Chaired by Prof. M. Fusaro and Prof. S. Ferrari, this Working Group will be formally established at the WCO-IOF-ESCEO 2023 and will meet to discuss specific research directions for this important topic.
SKELETAL RARE DISEASES

WEBINARS

A Practical And Clinical Approach To Skeletal Rare Disorders With Illustrative Cases
May 18, 2022, Speaker: Prof. Manju Chandran

Fibrous Dysplasia Of Bone/McCune-Albright Syndrome, an update
September 27, 2022, Speaker: Prof. Roland Chapurlat

PODCASTS

To expand knowledge of rare skeletal diseases, 25-minute podcasts to highlight specific topics related to skeletal rare diseases were broadcast with leading experts.

Challenges in screening, diagnosis and management of FGF-23 hypophosphatemic diseases
Speaker: Assoc. Prof. Kassim Javaid, moderator Dr. Manju Chandran

The impact of chronic hypophosphatemia on multiple body systems over the life course
Moderator: Assoc. Prof. Kassim Javaid, Speaker Prof. Maria Luisa Brandi

FACT SHEETS

Illustrated fact sheets providing key information and diagnostic algorithms were created and disseminated widely through the IOF network and social media.

- X-Linked Hypophosphatemia (XLH) in adults
- Tumor-Induced Osteomalacia (TIO) in adults

SURVEY ON DIAGNOSIS & MANAGEMENT OF HYPOPHOSPHATEMIC OSTEOMALACIA

A survey was prepared to gather insights from physicians who treat patients with hypophosphatemic osteomalacia (including TIO, XLH, FGF23-mediated disorders). The survey will be widely disseminated in the first three months of 2023 via the IOF newsletter and social media channels.
KEY PUBLICATIONS IN 2022

IOF WORKING GROUPS (WG)
- The global approach to rehabilitation following an osteoporotic fragility fracture: A review of the Rehabilitation WG of the IOF CSA Osteoporos Int. 2022
- Is it time to consider population screening for fracture risk in postmenopausal women? A position paper from the IOF Epidemiology/Quality of Life WG Arch Osteoporos 2022
- Population screening for fracture risk in postmenopausal women: a logical step in reducing the osteoporotic fracture burden? Osteoporos Int. 2022

CROSS SOCIETY COLLABORATIONS
- The need to distinguish intervention thresholds and diagnostic thresholds in the management of osteoporosis Osteoporos Int 2022
- Experience of a systematic approach to care and prevention of fragility fractures in New Zealand Arch Osteoporos 2022

OTHER PUBLICATIONS AND ENDORSEMENTS
- Osteoporosis in Europe: A compendium of country specific reports Arch Osteoporos. 2022

REGIONAL PAPER

COLLABORATION AND JOINT INITIATIVES

Alliances and joint initiatives with scientific organizations across a spectrum of related disease areas help to increase IOF's organizational outreach, and expand education and best practice to a broader range of health professionals around the world. As well as collaborations within the Asia Pacific region and specifically APCO (see page 44) and longstanding collaboration with ESCEO, IOF participated in the following scientific collaborations in 2022:

- Capture the Fracture® sessions were held in cooperation with many related organizations, including FFN (in Hong Kong and Thailand), National Council for Secondary Fracture Prevention in Turkey, National Osteoporosis Foundation in South Africa, among others.
- AMMOM-IOF online session (Trends and key data on bone fragility in Latin America) held on Feb 24, 2022, was followed by a collaboration agreement for secondary fracture prevention in Mexico, formalized during the Allied Societies Summit at the AMMOM CXXI Congress.
- ESCEO-IOF Symposium at 10th BRADOO Congress (Management of patients at very high risk through sequential treatments), October 21, 2022
- Joint IOF-ABOOM Symposium, Brazil (Post-fracture care in Brazil), May 26-28, 2022
- IOF-ESCEO Symposium (Post-fracture care in the Asia Pacific) at the SICOT World Congress, September 29, 2022
- IOF-NOFSA Symposium (Post-fracture care in South Africa), October 8, 2022
IOF and the Bone Health & Osteoporosis Foundation (BHOF) in the USA developed a simple visual aid to help primary care providers initiate dialogue with their patients about osteoporosis and fracture risk during a medical consultation.

Through this new tool, we hope to encourage primary care providers to engage in constructive dialogue that will improve their patients’ understanding of fracture risk and the benefits of adherence to anti-osteoporosis treatment.

Prof. N. Harvey, Chair of the CSA

Key messages are provided to assist clinicians in explaining the benefits to treatment versus the risk of rare side effects from the treatment, supported by visual aids to help patients better understand this risk versus benefit discussion.

Helps to initiate dialogue with patients
Uses easy to understand visual aids
Demystifies the real risk of rare side effects
Available in 5 languages (EN, SP, DE, FR, JP)

CLICK HERE! DOWNLOAD THE TOOL NOW

The tool, available in PDF form and in several languages, lists essential questions for osteoporosis and fracture risk assessment and illustrates a screening and management algorithm based on either UK or US guidance.
HEALTHCARE PROFESSIONAL EDUCATION
IN LATIN AMERICA

With leading regional medical and scientific experts in its ranks, IOF Latin America has established an impressive portfolio of training programs, courses and webinars, and participates at national medical congresses in the region.

FLS CAFÉ

Driven by the regional office, Capture the Fracture® (CTF) continued to foster FLS implementation by supporting and disseminating useful tools and resources for Fracture Liaison Services (FLS) in Latin America. An essential part of the educational program for HCPs are FLS Café, the IOF TOUR, and dedicated webinars. Together with the IOF CTF mentors, IOF identifies opportunities to present and promote FLS benefits to target audiences and key stakeholders.

FREE REGISTRATIONS FOR MEMBERS

IOF LATAM continued to strengthen the knowledge network in the region by becoming a link between member societies in Latin America. Through a knowledge sharing initiative led by IOF, member societies offer complimentary registrations to their congresses, annual meetings, and scientific activities which IOF distributes among other CNS members throughout the region.

In 2022, IOF successfully organized six editions of FLS Café events which gathered 50 FLS from Argentina, Brazil, Colombia, and Mexico, for more than 107 healthcare professionals dedicated to secondary fracture prevention based on the implementation of FLS. During these two-hour sessions, country CTF mentors together with renowned invited international experts presented and discussed key topics related to the running and optimal management of an FLS, including the benefits of FLS to reduce secondary fractures and the management of patients at risk. Presentations were followed by an open roundtable discussion on controversial clinical cases and main barriers faced by FLS coordinators and their teams on a daily basis.

50 FLS
4 COUNTRIES

LATIN AMERICAN AUDIT 2021

This landmark report provides updated information on demographic indicators, and up to date epidemiological data and costs on osteoporosis and fragility fractures in Latin America. It also describes infrastructure available and health policies on osteoporosis management within the region.

The LATAM Audit 2021 compiles information from 19 of the 20 countries that make up Latin America, representing 98.2% of region’s total population, and includes 5 more countries than the 2012 edition. For detailed information see page 41.

IOF CNS WORKING GROUP - GLUCOCORTICOID INDUCED OSTEOPOROSIS

Authored by O.D. Messina et al, the paper was published in the journal Aging Clinical and Experimental Research.

CALCIUM SURVEY FOR COSTA RICA AND PANAMA

The study was the first conducted in Central America using the IOF Calcium Calculator with the aim to survey calcium intake in Costa Rica and Panama. The field survey included 1,189 participants, 50% men.

The investigation showed that calcium intake is deficient in both countries.

Media calcium intake was reported of 862 mg/d (IQR 650.5 – 1,115) in Costa Rica and 825.5 mg/d (IQR 579.75– 1,029.2) in Panama. The paper was published in Spanish at Nutrición Hospitalaria - Arán Ediciones, S.L. (nutricionhospitalaria.org).

To disseminate key findings in both countries IOF partnered with CNS members, ACCMYO in Costa Rica and FOSEMO in Panama, to organize a series of media actions and events. In Panama, a breakfast meeting took place on October 13th, 2022, with the attendance of KOL, media, and representatives of the technical areas of Panama’s Ministry of Health.

In Costa Rica, IOF and ACCMYO hosted a workshop target to general public with a focus on healthy habits. On October 15th, 150 people enjoyed a morning of trivia games, exercises and healthy nutrition tips brought by Costa Rican experts committed to bone health.
IOF JOURNALS

IOF’s scientific journal portfolio includes three peer-reviewed journals which are leading publications in the bone field, and key assets in our mission to promote high-quality research, medical innovation, and improved patient care. With regular online communication IOF works to promote the journals’ papers.

CALCIFIED TISSUE INTERNATIONAL & MUSCULOSKELETAL RESEARCH

Publishes cutting edge preclinical and translational research in the bone and muscle field, including state-of-the-art reviews.

Editors-in-Chief:
René Rizzoli, Stuart H. Ralston

2021 Impact Factor 4.000
5-year Impact Factor 4.227

OSTEOPOROSIS INTERNATIONAL

A leading forum for clinical research in the diagnosis, prevention and management of osteoporosis and related musculoskeletal diseases.

Editors-in-Chief:
John A. Kanis, Felicia Cosman

2021 Impact Factor 5.071
5-year Impact Factor 5.137

ARCHIVES OF OSTEOPOROSIS

This online journal, the sister publication of Osteoporosis International, highlights clinical aspects of osteoporosis and is a forum of choice for regional research and guidelines.

Editors-in-Chief:
John A. Kanis, Felicia Cosman

2021 Impact Factor 2.879
5-year Impact Factor 3.236

In 2012, the International Osteoporosis Foundation developed Capture the Fracture® (CTF), a global program which provides recognition, resources, training and tools to support the implementation, scalability, and quality improvement of Post-Fracture Care Coordination (PFC) Programs, such as Fracture Liaison Services (FLS), worldwide.

The implementation of FLS is recognized as the single most important step in directly improving patient care and reducing spiraling fracture-related healthcare costs worldwide.

The Capture the Fracture® initiative guides healthcare systems in implementing their own FLS and provides a platform for the global exchange of existing projects and resources on FLS and local implementation strategies.

10 YEARS OF CAPTURE THE FRACTURE®

World Osteoporosis Day on October 20, 2022 marked 10 years since the official launch of Capture the Fracture®. Since its launch, the CTF network has rapidly grown from 53 FLS to 805 FLS. To mark the occasion of the 10th anniversary of the CTF program, IOF launched a social media campaign to put the spotlight on the FLS that make up the CTF network.

In total, 36 FLS participated, leading to nearly 100 social media posts on IOF’s communication channels, including Facebook, LinkedIn and Twitter. Between September 2022 and January 2023, the campaign reached more than 57,200 people worldwide.

KEY ACHIEVEMENTS IN 2022

The CTF Map of Best Practice is the only global platform to give visibility and recognition to PFC programs/FLS worldwide. The past year has seen growing interest with 120 new FLS joining the CTF network (an increase of 18%), bringing the total to 805 FLS – a new milestone to be celebrated!

As well as surpassing the 800 FLS mark, CTF achieved a noteworthy milestone of 52 countries represented on the Map. The CTF Network welcomed the first FLS from Iran and Panama in 2022, demonstrating the growing interest in post-fracture care worldwide.

By December 2022, the CTF Map of Best Practice included 385 FLS in Europe, 175 in the Asia-Pacific, 127 in Latin America, 82 in North America, 16 in the Middle East and 20 in Africa. This year, the FLS in the CTF network saw a total of 460,000 patients, which represents a 10% increase compared to last year.

FLS shared images of their dedicated multidisciplinary teams and inspiring messages about the improvements in patient care since initiating the service and the number of patients helped throughout the past decade.

In addition, two videos were created and shared on IOF social media channels to mark the 10th anniversary and give thanks to all the FLS that have helped grow the CTF network and positively impact post-fracture care and secondary fracture prevention around the world.
Launched in 2019, the Capture the Fracture® Partnership is an extension of the Capture the Fracture® initiative and aims at advancing and fostering the implementation of Post-Fracture Care Coordination Programs, including Fracture Liaison Services, and focusing on improving patient care worldwide for osteoporotic patients.

Many of the important activities in Policy, Coalition and Mentorship pillars carried out under the Capture the Fracture® umbrella were supported by Amgen and UCB.

POLICY

With the objective of bringing policymakers, regulators, professionals and patients, organizations and opinion leaders together around a defined call to action to drive policy change to enable specific, impactful changes at the local, regional and national levels, the Capture the Fracture® program developed Country Policy Landscape Assessments.

These are comprehensive documents tailored to the specific national policy situation, making the case for secondary fracture prevention and Fracture Liaison Services in the country.

The Country Policy Landscape Assessment documents aim to build the response for policy change, focusing on different key areas:

- Current and future burden of fractures
- Existing and planned policy priorities.
- Expected benefits and outcomes of a strong secondary fracture prevention strategy.
- Recommendations and implementation plan.

The Country Policy Landscape assessments are meant to be used by a plurality of stakeholders to support their efforts in driving improvements in the standard of care for osteoporotic patients, by advocating for policy changes, supporting FLS implementation and sustainability, and advancing standards for post-fracture care.

To do so, the reports include various key messages for the national societies, healthcare professionals, and key stakeholders in the country, helping them raise awareness and argue for the need for post-fracture care in the country with various entities, such as governmental institutions, hospital management or the lay public.

In 2022, the County Specific Policy Landscape Assessment were finalised for the following countries:

- Italy
- France
- Netherlands
- Spain
COALITIONS

Coalitions for Post-Fracture Care (PFC) around secondary fracture prevention are the essential pivot step of the Capture the Fracture® Program as they permit interactions with Key Opinion Leaders (KOLs) and stakeholders for all the aspects related to driving secondary fracture prevention at the local level.

The Capture the Fracture® initiative will serve as the catalyst to establish the optimal broad-based fracture prevention coalition that unites existing international and national advocacy, medical and scientific societies, patient societies, multispecialty societies and NGOs.

The Coalitions at the country level will support:

- Driving Policy changes
- Driving insurance policy changes
- Education of HCPs through Mentorship
- Improvement of the quality standards of patient care
- Development and improvement of Post-Fracture Care coordinated programs.
- Communication of the initiative at the national level through active liaison with the national media

The national coalitions will be comprised of a multidisciplinary pool of experts and complementary KOL’s representing different medical specialties, who have expertise in Fracture Liaison Services, engaging with policymakers and insurance providers, linking with the media, and in patient advocacy and support.

In 2022, with the support of the IOF, national coalitions have been established in Turkey and Mexico.

The National Council for Secondary Fracture Prevention in Turkey was initiated on May 23rd, 2022, in close partnership with key Turkish experts and stakeholders involved in post-fracture care and secondary fracture prevention, including representatives of the Turkish Osteoporosis Society, the Osteoporosis Patient Society of Turkey, the Society of Life with Osteoporosis, the Society of Endocrinology and Metabolism of Turkey, the Turkish Society of Physical Medicine and Rehabilitation, The Turkish Orthopaedics and Traumatology Association, and the Fragility Fracture Network Turkey.

In October 2022, the National Council for Secondary Fracture Prevention met to discuss the priorities and challenges in the post-fracture care and secondary fracture prevention Landscape in Turkey, and draw the foundations of their strategy and roadmap for the country.

Members of the Coalition for Secondary Fracture Prevention have highlighted the challenges currently faced by post-fracture care in the country due to the complexity of the Mexican healthcare system, and are developing a strategy to move secondary fracture prevention forward in the country.
MENTORSHIP

IOF, under the umbrella of the Capture the Fracture® program, has developed a Mentorship program to enable the implementation of Post-Fracture Care (PFC) coordination programs, such as Fracture Liaison Services worldwide.

To achieve this goal, IOF facilitates the transfer of knowledge and skills by connecting experienced PFC program champions with any institutions willing to establish a new PFC program.

In 2022, 36 experts from 7 different countries completed their training and became CTF-certified mentors in France, Italy, Japan, Saudi Arabia, South Korea, Spain, Taiwan.

This brings the community of Capture the Fracture® mentors to 70 experts, from 14 countries around the globe.
Communication and outreach are at the core of all IOF programs and projects and are integral to IOF’s mission as we seek to change the perception of osteoporosis, raise awareness of its burden, advance knowledge, drive policy change, and alert and engage patients and the general population.
WORLD OSTEOPOOROSIS DAY

World Osteoporosis Day (WOD), marked on October 20th each year, is the key opportunity to educate, inform and fight misconceptions about a disease that still suffers from underdiagnosis and treatment worldwide.

With an extensive and targeted campaign each year, IOF leads the way and supports its member societies worldwide which amplify the outreach to the public, patients, at-risk individuals, healthcare professionals, and policymakers. The campaign is hosted on www.worldosteoporosisday.org, a platform which offers a vast library of resources, key messages, and a global map of events and campaigns.

STEP UP FOR BONE HEALTH

In 2022, the campaign tagline 'Step up for Bone Health' addressed people of all ages, highlighting the importance of a bone-healthy lifestyle as the foundation for strong bones and a mobile, fracture-free future.

A variety of resources and communications urged the public and patients to 'step up for bone health' by ensuring:

- Regular weight-bearing & muscle-strengthening exercise
- A nutritious bone-healthy diet and adequate vitamin D
- No smoking and avoiding excessive alcohol intake
- Maintaining a healthy body weight
- Early awareness of risk – and the need to discuss bone health with your doctor as a cornerstone of early prevention.

As the global campaign speaks to a wide range of stakeholders, including healthcare professionals and healthcare authorities, the important role of Fracture Liaison Services and post-fracture care were reflected in the WOD social media campaign and a targeted press release.
GLOBAL EVENTS AND CAMPAIGNS

More than 225 campaigns or events were recorded in 50 countries, including 122 events/campaigns held by CNS member societies.

Due to the ongoing pandemic restrictions in some parts of the world, a large number of virtual campaigns were observed, these including online Facebook sessions, shared videos or webinars, as well as a strong focus on social media campaigns. IOF Executive Committee member and Treasurer Prof. René Rizzoli took part at a FIRMO Roundtable event in Rome, Italy on World Osteoporosis Day. IOF LATAM participated at the 5th Argentine Congress of Osteoporosis held at WOD and presented the IOF LATAM Audit.

PRESS AND SOCIAL MEDIA OUTREACH

IOF issued three global press releases which reached a potential audience of 2.2 billion people, and 135 social media messages were posted across seven IOF channels, with outreach to more than 145,000 people.

Press releases announced the 10th Anniversary of CTF (October 18th) and the availability of the new SCOPE interactive map with snapshots of osteoporosis in 29 European countries (October 19th), and a global release in 8 languages issued via PRNewswire urged ‘On World Osteoporosis Day, take five steps to better bone health’ (October 20th).

WORLD OSTEOPOROSIS DAY WEBSITE AND NEW RESOURCES

Featuring key messages, a global map of events, and hosting more than 100 multilingual resources on topics of interest to patients and the public, the WOD website attracted some 118,000 visitors in 2022.

RESOURCES WERE DOWNLOADED 17,000 TIMES – A 66% INCREASE FROM THE PREVIOUS YEAR.

In addition to a library of past resources, the WOD 2022 campaign introduced new posters and social media banners, as well was the following new resources:

- Exercise For Bone Health And Osteoporosis fact sheet
- Post Fracture Nutrition fact sheet
- Calcium Rich Foods List
- World Osteoporosis Day Osteoporosis Awareness Quiz

NEW

BONE HEALTHY RECIPES

On the occasion of World Osteoporosis Day, IOF introduced an attractive new website subsection to host calcium-rich and bone-healthy recipes from around the world. Recipes list nutritional values, can be filtered according to course or other criteria, and can be easily printed.

IOF will build on the library of recipes in the coming year.
The IOF Osteoporosis Risk Check, launched in 2019 and available in 36 languages, is an easy-to-use online questionnaire with 8 key questions and related resources. It is primarily a tool with which to alert the public to potential risk factors for osteoporosis.

The Risk Check continues to be the most widely disseminated IOF resource for patients and is an important way to increase global awareness and encourage people at risk to ask for testing.

The IOF website www.osteoporosis.foundation is an important global platform for accessible, targeted information on all aspects of osteoporosis, including rare skeletal diseases. As well as information tailored to patients and public, healthcare professionals and policy makers, there is information about the IOF network and IOF’s projects and programs.

The website also hosts a much-visited Educational Hub, which hosts more than 900 multi-language resources that can be freely accessed. The total number of page views increased by 7.5% and the number of downloads by 50% compared to 2021.

IOF’s social media channels continue to grow steadily in terms of followers, views and engagement, allowing increased communication to all stakeholders, including health care professionals, health authorities, members, patients and public. IOF maintains nine accounts, including four Facebook accounts (IOF, World Osteoporosis Day, IOF Latin America, IOF Connect Group), two Twitter accounts (IOF and IOF Latin America), Instagram, LinkedIn and YouTube.

The total number of posts issued in 2022 across all channels was 1,360, with the total number of people reached 1,486,915 (impressions). The numbers of followers across all channels increased by 18% from 2021 to 2022, from 31,379 to 37,070 followers. In particular, Instagram showed impressive growth in followers (+33.9%) and engagement (+36.7%), and twitter followers grew by 18.6%. Linkedin saw a 27.8% increase in impressions to close to 200,000, with engagement up by 16.5%.

IOF issued 48 press releases through international press agencies in 2022, primarily highlighting new scientific papers and position statements, World Osteoporosis Day, and policy news and events. As well, more than 65 news stories were featured in English and Spanish on the IOF website.

IOF’s monthly newsletter to more than 29,000 subscribers reports on organizational news, events, publications and resources, Capture the Fracture® highlights, as well as member news and upcoming events.

### Press and News Releases

IOF’s monthly newsletter to more than 29,000 subscribers reports on organizational news, events, publications and resources, Capture the Fracture® highlights, as well as member news and upcoming events.

### The 206

IOF’s monthly newsletter to more than 29,000 subscribers reports on organizational news, events, publications and resources, Capture the Fracture® highlights, as well as member news and upcoming events.
Both in space and on earth, exercise is needed to maintain strong bones and muscles. Astronauts in the low gravity of space, like women at menopause, are affected by rapid bone loss and loading/weight-bearing exercise is a critically important way to counteract this loss. With this key fact in mind, IOF launched a unique bone health awareness campaign together with the European Space Agency (ESA) and renowned ESA astronaut Samantha Cristoforetti.

The #LiftOffForBoneHealth social media campaign was carried out from April to October 2022, during Samantha Cristoforetti’s 170 days aboard the International Space Station for ESA’s Mission Minerva.

The campaign was instrumental in amplifying IOF’s messages about the importance of loading exercise and a bone-healthy lifestyle for osteoporosis prevention to a new and younger global audience, as well as to women reaching the menopause.

Six impactful videos, in 3 translations and subtitled in 10 languages with the help of our member societies, touched on the following topics:

1. Importance of load-bearing exercises
2. Bone-healthy nutrition
3. Beware bone loss in menopause
4. Exercise for rehabilitation/role of physiotherapists
5. Knowledge of osteoporosis risk factors

The videos continue to be shared through the IOF website and YouTube channels, reaching a huge international audience.

POLICY & ADVOCACY

Through its enormous global constituency (representing more than two billion people worldwide), scientific leadership, regional and multidisciplinary alliances, and influential initiatives, IOF is uniquely placed to advocate at the political level.

Our mission is to mobilize healthcare authorities to implement secondary fracture prevention strategies and to make change happen for the benefit of patients worldwide.
IOF REGIONAL AUDITS AND POLICY REPORTS

Unique within the osteoporosis arena, IOF’s global and regional policy reports and audits are among the most widely disseminated and oft-cited publications in the field. In 2022, IOF added to its library of policy resources by publishing a new Latin America Audit, and by expanding its ‘SCOPE’ European resources to include an interactive map.

LATIN AMERICAN AUDIT

In 2022, 10 years following the publication of the first Latin American Audit, IOF published the updated report ‘LATAM Audit 2021: epidemiology, cost and impact of osteoporosis and fragility fractures in Latin America’. The Audit collects data from 19 of the 20 countries in Latin America, representing more than 94% of the regional population and five more countries than in 2012.

Let us together take decisive action to address the barriers and challenges revealed in this report, to build on the achievements made to date, and to consign osteoporosis to history

Prof. Cyrus Cooper, IOF President

The findings will help experts to quantify the burden of this disease, as well as to more fully understand the barriers and opportunities that must be addressed across the region.

The report was published in Spanish with the English and Portuguese translations to follow in 2023. It was launched on August 11th, in a Meet-the-Expert Session with opening remarks by IOF President Cyrus Cooper.

The dissemination of the findings took place throughout the region, including at the XXI Congress of Bone & Mineral Metabolism, Mexico (AMMOM) in August 2022, a Facebook Live Scientific Session, Colombia (ACOMM, Oct 5), 5th Argentinean Congress of Osteology of the Argentinean Society (SAO and AAOMM, Oct 19), ACCMYO Symposium at the National Medical Congress in Costa Rica (ACCMYO, Nov 5), and at the Congress of Gynaecological Endocrinology, Chile (SOCHED, Nov 4).

It presents updated information on the demographics, including population projections to 2050; the frequency of fragility fractures in men and women over 50 in the period 2015-2019; the direct costs of fragility fractures; the infrastructure related to fragility fracture care; and the health policies implemented in the management of osteoporosis.
The Scorecard for Osteoporosis in Europe (SCOPE) aims to raise awareness of osteoporosis care in Europe, permitting an in-depth comparison of the quality of care in the 27 countries of the EU plus the UK and Switzerland (EU27+2).

Together with its related country-specific publication, SCOPE reveals that there is a large osteoporosis treatment gap, and that fragility fractures pose a major health care burden and result in high costs to European health care systems. The publications:

**Summarize key indicators**
for 4 domains: burden of disease, policy framework, service provision, service uptake.

**Compare the original results**
from 2010 to data as recent as 2019.

**Draw attention**
to the disparities in healthcare provision that can serve in the setting of benchmarks to inform patients, healthcare providers and policy makers in the EU.

A related SCOPE publication gives detailed country-specific metrics for each of the EU27+2 countries.

In 2022 a new interactive online map was added to the library of SCOPE resources which include Scorecard, country-specific fact sheets, summary report, slides, and infographics.

The SCOPE Map provides a snapshot of five key facts and statistics for each of the EU27+2 European countries.

Viewers can also click to access their country's more detailed illustrated fact sheet, with a comparative scorecard.

SCOPE aims to stimulate a balanced, common, and optimal approach to managing osteoporosis throughout Europe. By optimizing policy frameworks, service provision and uptake, we can improve bone health and reduce the costly burden of fragility fractures.

*Prof. John Kanis, IOF Honorary President, SCOPE 2021 lead author*

Intensive dissemination of the SCOPE resources continued in 2022, with resources shared or hosted at the national level by 15 European CNS societies.

SCOPE findings were presented at meetings in Italy (R. Rizzoli at FIRMO event), in Finland and in a dedicated BoneCast session (N. Harvey) and at further meetings in Italy and Switzerland (S. Ferrari).
The National Coalition for Secondary Fracture Prevention represents a remarkable opportunity to prioritize osteoporosis and fracture prevention in Mexico.

Dr Philippe Halbout, IOF CEO

IOF’s role as a pro-actively organizes meetings with healthcare authorities and policymakers or is invited to specific national or regional policy-related events. Among the events in 2022, IOF’s CEO participated at the first meeting of the National Coalition for Secondary Fracture Prevention in Mexico in October 2022, which brought together representatives of 10 renowned Mexican institutions from the public, private, and civil society sectors.

As a speaker at the Meeting, Dr Halbout proposed, among other goals, a collaborative framework in which participants committed to work to promote dialogue with policymakers to drive policy change.

IOF Compendium of Osteoporosis

This comprehensive reference on osteoporosis provides all key stakeholders in the field with a concise overview of the pathophysiology, risk factors, prevention, and management of the disease.

It documents the prevalence of osteoporosis and related fractures both globally and regionally, and outlines current research on the epidemiology, mortality, health expenditure, and access to/reimbursement for diagnosis and treatment for each region of the world.

Policy Meetings

The Nutrition Pages of the IOF Website are the Most Highly Viewed Pages, Including More Than 250,000 Visitors to IOF’s Online Calcium Calculator.

In 2022, the IOF website’s nutrition section was visually enhanced, including with the launch of the Bone-Healthy Recipes section.

Calcium and Nutrition Initiative

IOF promotes global awareness of bone-healthy nutrition through many resources and projects.

NCD Alliance

Representing a network of more than 2,000 organizations in 170 countries, the Non-Communicable Disease Alliance (NCD Alliance) aims to prioritize non-communicable diseases within the global health agenda.

As a member of the NCD Alliance Supporters Group, IOF represents the bone field within the Alliance, seeking to raise the profile of musculoskeletal diseases as a priority healthcare issue.

Fragility Fracture Alliance (FFN)

IOF-FFN collaboration, which began in 2018 with the ‘Global Call to Action’, sets the framework for joint opportunities and optimization of resources.

Sharing complementary visions and missions, IOF and FNN together champion a systematic approach to fragility fracture care with the goal of restoring function and preventing subsequent fractures.
COLLABORATIONS IN ASIA-PACIFIC

The Asia Pacific region is faced with a rapidly ageing population and an epidemic of fragility fractures.

In cooperation with regional experts, policy makers and other concerned organizations, IOF works to expand preventive strategies to tackle the fracture crisis, particularly through secondary fracture prevention. In past years, IOF has engaged in the following fruitful collaborations and alliances:

ASIA PACIFIC CONSORTIUM ON OSTEOPOROSIS (APCO)

Represented on the APCO Executive Committee by its CEO, IOF has been a strong support of APCO. In particular, IOF amplified public outreach for the APCO Framework and the Peer-to-Peer Health Care Professional Education Modules, and in August 2022, the broad dissemination of the new APCO Quality Improvement Toolkit. A major highlight was the first face-to-face APCO summit since the beginning of the pandemic, held on December 10, 2022.

Singapore’s Health Minister was a guest of honour and IOF CEO Dr Philippe Halbout was among the key expert speakers. The Summit garnered significant attention in news media, leading to an interview on Channel News Asia-Singapore Tonight. The interview afforded an opportunity for IOF’s CEO and APCO Executive Committee Chair Prof. Manju Chandran to highlight the fragility fracture crisis and share insights on APCO’s vision and mission.

ASIA PACIFIC FRAGILITY FRACTURE ALLIANCE (APFFA)

The Alliance brings together representatives of four regional (AFOS, AOSPRM, APGMN, APOA) and three global (IOF, FFM, ISCD) organizations to focus on three pillars of action: improved acute post-fracture care, rehabilitation, and secondary fracture prevention. In 2022 a full-day hip fracture registry workshop took place and an APFFA-APOFFS survey was issued to discover regional surgeons’ attitudes and perception of fragility fracture management.

IOF-ASIA PACIFIC ORTHOPAEDIC ASSOCIATION (APOA) ORTHOPAEDIC INITIATIVE

Dissemination of the IOF-APOA report ‘Closing the Gap Between Orthopaedic Surgeons and Physicians in Secondary Fracture Prevention: A Call to Action’, published in 2021 under the umbrella of the APOA-IOF Orthopaedic Initiative, continued in 2022. Notably, a joint session was held at the 22nd APOA Congress in Manila from Nov 24-26, 2022.

A further collaboration in the region includes the IOF-AFOS-ISCD Regional Alliance.

IOF GLOBAL PATIENT CHARTER

The IOF Global Patient Charter developed in cooperation with IOF member societies, has been endorsed by 148 organizations and international organizations to date, including more than 100 CNS societies.

The page has attracted more than 75,000 visits and close to 11,000 individual signatories. Available in 30 languages, this important advocacy tool advocates for the rights of all patients to have:

DIAGNOSIS

Timely and accurate assessment of fracture risk, falls risk and diagnosis of osteoporosis.

Timely and correct diagnosis of rare bone disorders.

PATIENT CARE

Access to effective intervention options including treatment, lifestyle changes and regular drug treatment review by appropriate healthcare professionals.

Access to post-fracture care coordination programs for optimal care after a fracture.

PATIENT VOICE

Involvement and choice in a long-term management plan with defined goals.

SUPPORT

Care and support from society and healthcare providers, to ensure active and independent living.

SIGN THE CHARTER
